Tools used for stripping the paint

- Stripper 7, 8010-00-181-7568, this product used with the tools shown to the left, will remove the paint around the entire torquemeter support in approximately 20 minutes.
- Thinner, Polyurethane Thinner, 8010-00-181-8080, this product will quickly clean (less than 20 minutes) the torquemeter support to provide good paint adhesion.
- The curing time for painting will vary based on environmental conditions.
